Abductive reasoning (also called abduction, abductive inference, or retrodution) is a form of logical inference which starts with an observation or set of observations then seeks to find the simplest and most likely explanation. In abductive reasoning, unlike in deductive reasoning, the premises do not guarantee the conclusion. One can understand abductive reasoning as inference to the best ...

Abductive reasoning - Wikipedia

Psychological operations (PSYOP) are planned operations to convey selected information and indicators to audiences to influence their emotions, motives, and objective reasoning, and ultimately the behavior of governments, organizations, groups, and individuals.. The purpose of United States psychological operations is to induce or reinforce behavior favorable to U.S. objectives.
